Siemens vouches for the durable quality of the motor in all iQ 800 and iQ 890 washing machines with a 10year motor warranty. The gentle wash cycle protects the sensitive waterimpermeable membrane. When used with a waterproofing agent,

the programme is highly suitable for allweather, sports and outdoor clothing. This depends on different factors such as the type of textiles, load size, water hardness and degree of soiling. Incorrect dosage not only leads to poor washing results and damages the fabric, but it also increases water and energy consumption. The new iQ 800 with iDos uses only as much detergent, water and energy as required. It detects not only the type of fabric, but also the load size precisely in 256 increments. As a result, waterPerfect Plus always achieves a perfect wash result for every wash cycle with optimum water consumption. Every stain is different and needs a special treatment to be removed, whether its tomato, grass, or red wine. And stainRemoval always knows exactly how. Beginning with the temperature sensor, controlling the right temperature concerning the molecular properties of the stain. And the flow sensor and the load sensor Plus supply just the right amount of water necessary to completely wash it out. Now 16 most stubborn stains can reliably and automatically be removed. Ideal for athletes who have to wash their sports clothing again and again even though they're only lightly soiled. For gentle treatment of your laundry. The enhanced insulation also regulates noise levels, making Bosch dryers very quiet even during the spin cycle. Our ActiveWater Plus technology delivers perfect results while only using the precise amount of water needed for every wash, even with small loads. Its integrated sensors automatically adjust the water consumption according to the fabric type and the load.

So perfect laundry and less water wasted. Please note that depending on the settings you choose, the full functionality of the website may no longer be available. Never again. The new Bosch washing machines with the automatic dosing system iDOS set the precise amount of detergent for you, down to the nearest millilitre and it only takes the touch of a button. Precisely dosed detergent not only protects your laundry, but is also good for the environment and your bank account. Discover iDOS from Bosch. Because the new Bosch washing machines with the automatic dosing system iDOS will set the precise amount of detergent for you, down to the nearest millilitre. Now that your measuring cups are redundant, are you wondering what you can do with them. Our films will give you some inspiration! This can result in discolorations and unpleasant odours. That is bad for the environment and bad for your bank account. Visible detergent residues may also be left on your clothes, which can trigger skin irritation and allergies. Integrated sensors detect the type of fabric, the load volume in the drum and the degree of soiling, and individually adjust the detergent dosing accordingly. This means you achieve perfect washing results while saving water and detergent. Simply and automatically. Once it has been set, iDOS considers the water hardness in each wash. Simply fill up the convenient tank just once and wash several loads of laundry. In addition to the tank for liquid detergent, the iDOS system also has a second tank for fabric conditioner. Needless to say, you can still dose detergent manually, too. You don't just save a lot of water you also use up to 30% less liquid detergent. They're certainly not needed for dosing detergent any more. Register your Bosch home appliances and receive many other available benefits. This means fewer pollen particles, animal hairs and dust mites in your dried laundry.

Our dryers, which are ideal for allergy sufferers, have therefore been awarded the ECARF Quality Seal. The result is soft laundry with no creases. From prewash cycles to specialized settings for towels, bedding, allergens, and waterproof items, there are a lot of options on a modern washing machine. For the most part, the cycle settings are pretty straight forward. But the "prewash" cycle might leave you scratching your head. Why in the world would you want to prewash your clothing Most machines don't allow prewash for the Speed Wash, Delicates, Rinse and Spin, and Wool cycles. Once the prewash cycle is complete, the washer will run the regular cycle you select. When you're dealing with piles of clothes soiled from sports games, yard work, construction jobs, and mud runs, the prewash will do wonders for removing the odors and dirt, as well as preventing stains. The prewash will rinse away urine, dirt, food, and other notsopleasant soil so that the normal wash cycle can disinfect and clean the clothing in fresh water. All washers will have slightly different settings and control panels. However, the process below will apply to most machines. You may be surprised by how well the prewash cycle removes and treats stains.
